

**Client** \_\_\_\_\_

Walverden Primary School

**Project Description** \_\_\_\_\_

Replacement Window Scheme & Associated Works

**Project Details** \_\_\_\_\_

The works at Walverden Primary School involved stripping out existing rotten timber windows and replacing with new white PVC Windows and new white PVC Cladding.

A new opening was also formed within existing stonework in order to provide a new external door to one of the existing classrooms to provide wheelchair access to the external play area. In order for this to be achieved, mechanical services had to be altered and relocated.

Finishing items consisted of touching up decorations and a new tarmac ramp to negate the difference in levels around the new external door.

The project was completed on time, within budget and most importantly to the clients approval.

**Location** \_\_\_\_\_

Bracewell Street, Nelson, Lancashire, BB9 0TL
